Product Data Sheet:  
ELI-PATCH  
EPOXY REPAIR MORTAR  
6KG & 12KGS

A RAPID CURING EPOXY REPAIR SYSTEM BASED ON A BLEND OF EPOXY RESINS, CURING AGENTS AND SELECTED AGGREGATES.

FixMaster Eli-Patch is a two-component high strength epoxy resin patching mortar. It is easy to mix and creates minimal shutdown time to the area under repair. Ideal for repairing damaged concrete surfaces such as steps, ramps, spalled concrete and expansion joints

- Heavy duty, suitable for high traffic areas
- Internal / External application
- Can be applied to a feather edge
- Non-skid, abrasion resistant finish
- Excellent chemical resistance
- Pre-weighed packs ready for mixing onsite
- Low odour suitable for food environments

HOW TO USE IT:

Surface Preparation
Good surface preparation is essential. All surfaces should be dry, clean, sound and free from dust. Eli-Patch Primer is recommended to maximise adhesion particularly to shallow repairs.

Mixing
Empty the resin rich sand into the container. Shake the bottle of curing agent and decant into the sand. Mix thoroughly using a gloved hand or trowel. The product is ready to use when a uniform colour and consistency is achieved throughout.

Application
Surface temperatures should be above 5°C. Prime with Eli-Patch Primer if required. Apply the mixed mortar to the surface by trowel ensuring that the product is pressed well into place and filling all voids. A smooth finish is aided by wiping the trowel with solvent or dipping the trowel in water.

CURING TIMES @ 20°C:

<table>
<thead>
<tr>
<th>Traffic Level</th>
<th>Curing Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Light Traffic</td>
<td>2 hours</td>
</tr>
<tr>
<td>Heavy traffic</td>
<td>3 - 4 hours</td>
</tr>
</tbody>
</table>

COVERAGE:
6KG will cover 0.6m² @ 5mm thick

POT LIFE:
20 minutes @ 20°C

SHELF LIFE:
One year in sealed containers. Store in a dry place between 5-25°C

SAFETY:
It is recommended that protective clothing is worn when using Eli-Patch. If eyes are affected wash with lots of water and seek medical advice. For hands wash well with soap and water. Material Safety Data Sheets available upon request.
